Application for Certification for the
San Gabriel Generating Station

Docket No. 07-AFC-2

**SAN GABRIEL POWER GENERATION, LLC
SUSPENSION STATUS REPORT NUMBER 16**

In accordance with the Order Suspending Proceeding dated May 15, 2012 (“Order”), the applicant in this proceeding, San Gabriel Power Generation, LLC (“San Gabriel”), submits its suspension status report number 16. The Order instructed San Gabriel to file and serve monthly status reports beginning January 2, 2013 and continuing every thirty days thereafter.

San Gabriel filed an application for certification for the San Gabriel Generating Station, a 696 megawatt natural gas-fired electricity generating facility (“San Gabriel Project”) to be located at the site of an existing power plant in Rancho Cucamonga, California, within the jurisdiction of the South Coast Air Quality Management District (“SCAQMD”). San Gabriel requested the current suspension of this proceeding due to permitting difficulties associated with the unavailability within the South Coast Air Basin of certain emission offsets needed to satisfy applicable SCAQMD rules. Those permitting difficulties still exist and emission offsets are still not available for the San Gabriel Project.

As reported in its status report on January 2, 2013, San Gabriel is now an indirect, wholly owned subsidiary of NRG Energy, Inc. (“NRG”) following a merger that become effective in December 2012. NRG is continuing to assess the San Gabriel Project and evaluate potential opportunities to pursue active development. San Gabriel will provide an update regarding further progress in its next status report on March 1, 2013.

February 1, 2013

Respectfully submitted,

Lisa A. Cottle
