REVISED NOTICE OF RECEIPT
REVISED PETITION TO AMEND
THE ENERGY COMMISSION DECISION for the
GILROY COGENERATION PROJECT (84-AFC-4C)

California Energy Commission

DOCKETED
84-AFC-4C

TN # 69633

FEB 22 2013

On February 19, 2013, the Calpine Gilroy Cogen, L.P. filed a revised petition with the California Energy Commission requesting to modify the Gilroy Cogeneration Project. The revised petition is in regard to proposed conditions of certification from the Bay Area Air Quality Management District.

The applicant previously filed a petition to amend on December 11, 2012.

The 115-megawatt project was certified by the Energy Commission on November 13, 1985 and is located in the City of Gilroy in Santa Clara County.

DESCRIPTION OF PROPOSED MODIFICATION

The modification(s) proposed in the petition would install two new Selective Catalytic Reduction (SCR) units on the project's two auxiliary boilers. The use of the new SCR units would reduce nitrogen oxides (NOx) emissions.

The Bay Area Air Quality Management District has identified that the proposed modification would result in additional air quality conditions from the district.

The purpose of the Energy Commission's review process is to assess the impacts of this proposal on environmental quality, public health and safety. The review process includes an evaluation of the consistency of the proposed changes with the Energy Commission's Decision and, if the project, as modified, will remain in compliance with applicable laws, ordinances, regulations, and standards (Title 20, Calif.
