California Energy Commission
DOCKETED
09-AFC-7C
TN 69884
MAR 08 2013

## This docket contains the following documents:

- 1. Native American Heritage Commission (NAHC) letter (2-13-13) to the California Energy Commission (CEC) with attached list of tribes to be consulted concerning the Palen Solar Electric Generating System.
- 2. Site Vicinity Map and a PSEGS Facility Boundary Map. Each California Energy Commission Letter to each tribal entity also included two attached project maps; a Project Vicinity Map and a Project Site Map. However, this docket avoids redundancy by only providing one copy of each of the maps.
- 3. California Energy Commission letters (2-25-13) to each of the tribal entities listed in the NAHC letter. Because the Colorado River Indian Tribe provided two names under one address, the energy commission sent two letters to the Colorado River Indian Tribe. The San Manuel Band of Mission Indians has changed staff. Daniel McCarthy has replaced Ann Brierty and therefore, the California Energy Commission letter to the San Manuel Band of Mission Indians was addressed to Daniel McCarthy. This docket contains 15 California Energy Commission letters to tribal entities.

Re: Request for a Sacred Lands File Search and Native American Contacts List for the Nalep Solar Project LLC, a subsidiary of BrightSource Energy, Inc. (Project was formerly known as Palen Solar I, LLC) located on approximately 5,200-acresmidway between the cities of Indio and Blythe in the Chuckwalla Mountains; eastern Riverside County, California

#### Dear Dr. Gates:

A record search of the sacred land file failed to indicate the presence of Native American cultural resources in the immediate project. Also, the absence of specific site information in the sacred lands file does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in the project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe or group. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-6251.

Sincerely,

/Dave Singleten/ Program Analys

Twenty-Nine Palms Band of Mission Indians Darrell Mike, Chairperson 46-200 Harrison Place Coachella, CA 92236

RE: Palen Solar Electric Generating System (09-AFC-7C) - Invitation to Participate in California Energy Commission Tribal Consultation

Dear Honorable Chairperson Mike,

Your name was provided to the California Energy Commission (Energy Commission) by the Native American Heritage Commission (NAHC) in a letter dated February 13, 2013, as a representative of a Native American community who might be interested in the change in the design of the Palen Solar Power Project. The project is proposed to be located on 3,794 acres of Bureau of Land Management (BLM) land in Riverside County, California and is located approximately ¼ mile north of Interstate 10 near the Corn Springs Road exit, ten miles east of Desert Center and approximately halfway between the cities of Indio and Blythe. This letter provides general information concerning the project design changes, includes attached exhibits depicting the vicinity and project site location, and invites the tribe to participate in Energy Commission consultations with affiliated tribes.

Darrell Mike February 25, 2013 Page 2

electricity grid. Other onsite facilities will include access and maintenance roads (either dirt, gravel or paved), perimeter fencing, tortoise fencing and other ancillary security facilities. PSH does not propose to change the generating capacity of the Energy Commission-approved project, the site access, or the interconnection point at Red Bluff Substation, although there will be a slight re-routing of the generation tie-line near the western end of the route and around Southern California Edison's newly constructed Red Bluff Substation. In addition to approval from the Energy Commission, the amended project will require BLM to complete an environmental review and grant a right-of-way lease.

Over the coming months, the Energy Commission will be holding a number of public workshops and hearings on the proposal to determine whether the modified project should be approved for construction and operation and under what set of conditions. These workshops and hearings will provide the public and tribes, as well as local, state and federal agencies, the opportunity to ask questions about, and provide input on, the proposed modifications. The Energy Commission will issue notices for these workshops and hearings at least 10 days prior to the meeting. If you want to be notified by e-mail whenever a public meeting is scheduled or a document is posted to the project website, you can sign up for the project list server on the web page. Public notices can also be sent to you by mail at your request. Should the Tribe request, Energy Commission staff will arrange for a separate meeting to discuss issues that the Tribe may wish to hold in confidence from the general public.

To view a copy of the Petition to Amend and supplement for this compliance proceeding (09-AFC-7C) and find more information about the project and proceedings, please visit the project website. electricity grid. Other onsite facilities will include access and maintenance roads (either dirt, gravel or paved), perimeter fencing, tortoise fencing and other ancillary security facilities. PSH does not propose to change the generating capacity of the Energy Commission-approved project, the site access, or the interconnection point at Red Bluff Substation, although there will be a slight re-routing of the generation tie-line near the western end of the route and around Southern California Edison's newly constructed Red Bluff Substation. In addition to approval from the Energy Commission, the amended project will require BLM to complete an environmental review and grant a right-of-way lease.

Over the coming months, the Energy Commission will be holding a number of public workshops and hearings on the proposal to determine whether the modified project should be approved for construction and operation and under what set of conditions. These workshops and hearings will provide the public and tribes, as well as local, state and federal agencies, the opportunity to ask questions about, and provide input on, the proposed modifications. The Energy Commission will issue notices for these workshops and hearings at least 10 days prior to the meeting. If you want to be notified by e-mail whenever a public meeting is scheduled or a document is posted to the project website, you can sign up for the project list server on the web page. Public notices can also be sent to you by mail at your request. Should the Tribe request, Energy Commission staff will arrange for a separate meeting to discuss issues that the Tribe may wish to hold in confidence from the general public.

Preston J. Arrow-weed Ah-Mut-Pipa Foundation P.O. Box 160 Bard, CA 92222

RE: Palen Solar Electric Generating System (09-AFC-7C) - Invitation to Participate in California Energy Commission Tribal Consultation

Dear Mr. Arrow-weed,

Your name was provided to the California Energy Commission (Energy Commission) by the Native American Heritage Commission (NAHC) in a letter dated February 13, 2013, as a representative of a Native American community who might be interested in the change in the design of the Palen Solar Power Project. The project is proposed to be located on 3,794 acres of Bureau of Land Management (BLM) land in Riverside County, California and is located approximately ¼ mile north of Interstate 10 near the Corn Springs Road exit, ten miles east of Desert Center and approximately halfway between the cities of Indio and Blythe. This letter provides general information concerning the project design changes, includes attached exhibits depicting the vicinity and project site location, and invites the tribe to participate in Energy Commission consultations with affiliated tribes.

Preston Arrow-weed February 25, 2013 Page 2

electricity grid. Other onsite facilities will include access and maintenance roads (either dirt, gravel or paved), perimeter fencing, tortoise fencing and other ancillary security facilities. PSH does not propose to change the generating capacity of the Energy Commission-approved project, the site access, or the interconnection point at Red Bluff Substation, although there will be a slight re-routing of the generation tie-line near the western end of the route and around Southern California Edison's newly constructed Red Bluff Substation. In addition to approval from the Energy Commission, the amended project will require BLM to complete an environmental review and grant a right-of-way lease.

Over the coming months, the Energy Commission will be holding a number of public workshops and hearings on the proposal to determine whether the modified project should be approved for construction and operation and under what set of conditions. These workshops and hearings will provide the public and tribes, as well as local, state and federal agencies, the opportunity to ask questions about, and provide input on, the proposed modifications. The Energy Commission will issue notices for these workshops and hearings at least 10 days prior to the meeting. If you want to be notified by e-mail whenever a public meeting is scheduled or a document is posted to the project website, you can sign up for the project list server on the web page. Public notices can also be sent to you by mail at your request. Should the Tribe request, Energy Commission staff will arrange for a separate meeting to discuss issues that the Tribe may wish to hold in confidence from the general public.

To view a copy of the Petition to Amend and supplement for this compliance proceeding (09-AFC-7C) and find more information about the project and proceedings, please visit the project website. For access to all project information, including past project certification, go to: <a href="http://www.energy.ca.gov/sitingcases/palen">http://www.energy.ca.gov/sitingcases/palen</a>.

For access to specific project amendment and supplemental information go to: <a href="http://www.energy.ca.gov/sitingcases/palen/compliance/2012-12-18">http://www.energy.ca.gov/sitingcases/palen/compliance/2012-12-18</a> Pettition to amend TN-68910.pdf, and <a href="http://www.energy.ca.gov/sitingcases/palen/compliance/supplement">http://www.energy.ca.gov/sitingcases/palen/compliance/supplement</a> 1 pti/Supplement No 01.pdf.

Please consider reviewing the above referenced project information so that we can promptly proceed to meaningful dialogue that matches the pace of the project compliance process. Staff anticipates publishing its Preliminary Staff Assessment on the petition in May 2013. Staff will be following up this letter with phone calls to ascertain the tribe's level of interest.
