I need to apologize for my information about the 2410 rule for Prevention of Significant Deterioration, 2011, I was reading a draft of the rule. It was silly of me to think that the intent of the draft as stated in the title and in its content would be part of the adopted rule. The interpretation of the PSD rule used to prepare the PDOC using Shafter statistics is just fine because the SJAPCD does not really care about the reality of air quality the southern valley residents breath.
