California Energy Commission

DOCKETED

11-AFC-03

TN # 70235

APR. 08 2013

Congratulations to the CPUC for denying the permit to build the Quail Brush Power Plant. The whole plan was poorly conceived and an obvious attempt by outside interests to trample on the quality of life for local citizens for the financial gain of a few. I'm no tree hugging eco-nut but even a pro energy person would be embarrassed by this brazen disregard for human health and right to peaceful enjoyment. Good job CPUC! Its nice to know that you can do better, we can do better! Let's do better! If this thing has to be built then it can certainly be built somewhere that is not next to a peaceful neighborhood, a High School and a regional park! What a stupid idea. Good job and keep up the good work. Don't let these guys step on our necks with their steel toed boots.

Sincerely,
Adrian van Ravesteyn
