Subject: Docket 11-AFC-03 Quail Brush

Categories: Ready to Docket

Please deny the CoGentrix proposal to build a fossil fuel peaker plant adjacent to Santee/Mission Trails Park. Do not grant a suspension, because this is NOT what the PUC, the public, and the public's representatives in the affected municipalities have said.

How many times does CoGentrix have to hear the word NO before they understand it? I think CoGentrix' behavior is repulsive. This corporation wants to exploit our precious environment, our community, and our pocketbooks. They refuse to give up. The CEC needs to say NO firmly and clearly. The CEC must not give CoGentrix permission to act like a rapist who continues to attempt to assault an intended victim because in his twisted world view, "no" means "maybe." NO means NO.

We need rooftop solar, not fossil fuel peaker plants. We need them now. We don't need a peaker plant now, according to the PUC, and if we provide distributed solar PV solutions, we will never need one.

Sincerely

Katherine Stewart
