California Energy Commission DOCKETED 08-AFC-8A
TN # 70433 April 23 2013

Complaint or Comment About the California Energy Commission

Description of complaint or comment (people involved, dates, time, etc).

The HECA - SCS project near Bakersfield being considered by CEC is planning to produce large quantities of ammonia and ammonium nitrate. After seeing the disaster at West, Texas fertilizer plant explosion yesterday, it is a bad idea to produce the same chemicals in California and endanger the citizens. CEC should give serious consideration to this. No measure of safety will overcome the risks. Please pass this on to the CEC members. Concerned CA citizen

Would you like to discuss this complaint in detail with a Commission representative?

NO

Further Action to Be Taken

Please specify what action you would like the Energy Commission to take?

The HECA - SCS project near Bakersfield being considered by CEC is planning to produce ammonia and ammonium nitrate. After seeing the disaster at West, Texas fertilizer plant explosion, it is a bad idea to produce the same chemicals in California and endanger the citizens. No measure of safety will overcome the risks that are very obvious. CEC should give serious consideration to this.

Give a brief summary of any action already taken in relation to this complaint.

None

Give the name(s) of any person in the Commission already contacted in relation to this matter.

None
