Takeaways

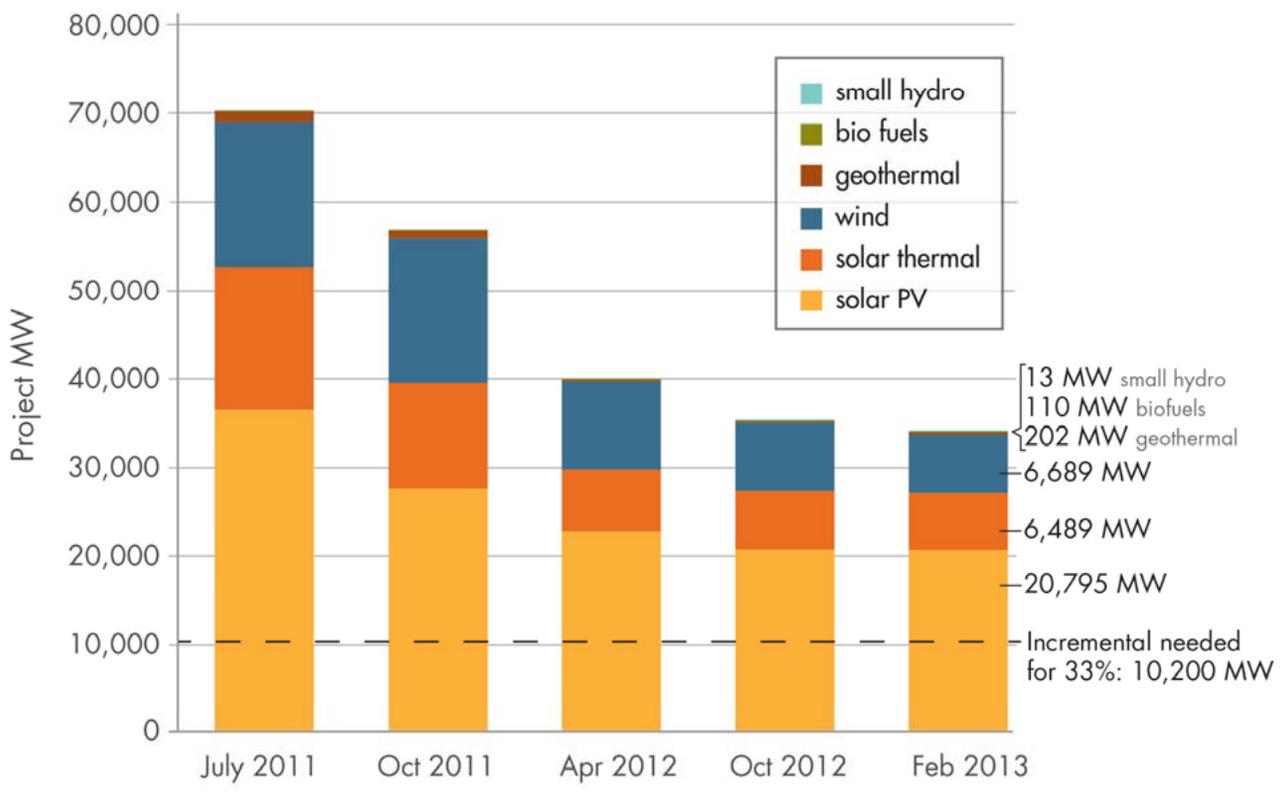

- Scenario Development and the Transmission Planning Process (TPP) Have Become Better Integrated
- There is Work to be Done
- Permitting of Generation is Not a Determinative Input into the TPP
- More Visibility Into Procurement Milestones (PPAs) Would Help the Most
- Aligning Procurement, Resource Adequacy, and TPP Will Do the Most to Ensure the Environmental Footprint of Transmission is Correctly Sized

Conclusions

- It is All About Procurement Decisions
 - Drives Ultimate Approval of Transmission Through the TPP
 - Biggest Impact on What Actually Gets Built
 - Drives Operational Issues Which Affect Future Transmission Development
- Regulatory Focus Should Be on Visibility and Decisions in the Procurement Process
