Subject: Docket No. 13-IEP-1 -- Comments on Petition for Societal Cost-Benefit Evaluation of California's Net Energy Metering Program

California Energy Commission

DOCKETED

13-IEP-01

TN # 71396

JUNE 24 2013

Jun 24, 2013

Chair California Energy Commission Robert Weisenmiller

Dear Chair California Energy Commission Weisenmiller,

I support the petition submitted on June 5, 2013 by the Sierra Club, American Lung Association in California and other parties requesting that the California Energy Commission (CEC) perform a societal cost-benefit evaluation of California's Net Energy Metering Program.

It's time to dismantle the archaic nuclear power plants like San Onofre and move into the 21st Century with rooftop solar and other forms of alternative energy.

We are an industrious and creative nation that can move forward with rooftop solar, etc. as long as California utilities get with the program and stop sabotaging those efforts. They will need to adapt or die, just like the rest of us.

Sincerely,

Patty Mooney
