Concurrent with this notice, the Energy Commission is also publishing changes to the text of the proposed regulations that were previously made available for 45-day public comment period ending April 16, 2013. These changes, known as 15-Day Language, are available on the Energy Commission's website at www.energy.ca.gov/portfolio/pou_rulemaking/ and are shown in underline/strikeout format relative to the language of the proposed regulations as published on March 1, 2013.

At the May 8, 2013 hearing, the Energy Commission will consider adoption of the proposed regulations with the changes as reflected in the 15-Day Language.

Background

The Energy Commission is proposing to adopt regulations establishing enforcement procedures for the Renewables Portfolio Standard (RPS) for local publicly owned electric utilities (POUs) under the law as amended by Senate Bill X1-2 (Stats. 2011, 1st Ex. Sess., ch. 1) and Assembly Bill 2227 (Stats. 2012, ch. 606, sec. 8). The proposed regulations will implement, interpret, and make specific several provisions of Public Resources Code sections 25741 and 25747, and Public Utilities Code sections 399.13, 399.15, 399.16, 399.21, 399.30, 9507 and 9508. The proposed regulations will be codified in the California Code of Regulations, Title 20, Division 2, Chapter 13, sections 3200 through 3208, and in Title 20, Division 2, Chapter 2, Article 4, section 1240.

The proposed regulations establish the rules and procedures by which the Energy Commission will assess a POU's procurement actions and determine whether those actions meet the RPS procurement requirements in the law. The proposed regulations determine what POU action is required by the law; so when the Energy Commission evaluates a POU's actions, it may determine whether the POU complied with the law. The proposed regulations require POUs to submit various information and reports to the Energy Commission, so the Energy Commission may verify and determine compliance with the RPS, and, if appropriate, issue a notice of violation and correction for a POU's failure to comply and refer the violation to the California Air Resources Board for potential penalties.

On March 1, 2013, the Energy Commission published the Notice of Proposed Action (NOPA)¹ for the proposed regulations in the California Regulatory Notice Register and published the proposed regulations, also referred to as the 45-day language Express Terms, on its website and in mailings to interested persons. The NOPA indicated that if substantial, sufficiently related modifications are made to the original 45-day language Express Terms, the modified text with changes in underline/strikeout will be made available to the public for at least 15 days before the Energy Commission adopts the final version of the regulations.

This Notice of Changes is provided in accordance with the NOPA and Government Code Section 11346.8, and provides notice of the 15-Day Language and an additional public comment period on such language. The 15-Day Language and related rulemaking documents can be obtained from the contact person designated below or from the Energy Commission website at: www.energy.ca.gov/portfolio/pou_rulemaking/

Should the Energy Commission determine that substantial, sufficiently related modifications to the 15-Day Language are needed, consideration of the proposed regulations will be continued to a future public hearing. In that case, revised 15-Day Language will be prepared and notice of the revisions and the future public hearing provided separately.
