It seems it would be effective for both LEA's and the CEC if the deliverable's are all the same format. If the CEC could provide editable forms (word and excel format) to use it would make generation and review of these deliverable's more effective. Standard form examples:

Bench marking report - show each element that will be required to be considered complete
Energy Project Prioritization
Sequencing plan
Energy Project Identification
Cost-effectiveness determination
Energy Expenditure plan
Reports

Thank you.
