**To:** Energy - Title24  
**Subject:** Proposition 39 Question

Hello,

My question pertains to the paragraph below from the Prop 39 draft implementation guidelines:

*Public Resources Code section 26235(b) states that “the Energy Commission shall allow the use of data analytics of energy usage data where possible in the energy auditing evaluation inventorying measuring and verification of projects. To ensure quality of results data analytics providers shall receive prior technical validation by the Energy Commission a local utility or the Public Utilities Commission.”*

How does a data analytics provider (like us) go about receiving technical validation by the CEC, local utility, or PUC?  
Can you provide more details and context?

Thanks so much.

Best regards,

**Kevin Flanagan**
