**To:** Energy - Docket Optical System  
**Cc:** Robert Desautels (rdesautels@atae.com)  
**Subject:** comments to draft PON from EPC

**Categories:** Ready to Docket

California Energy Commission

**DOCKETED**  
**12-HYD-01**

TN 72128

OCT. 21 2013

Here is a list of comments we discussed which should be submitted to the CEC. If you agree, please copy these and email to [docket@energy.ca.gov](mailto:docket@energy.ca.gov) and specify Docket 12-HYD-01 in the subject line with your organizations name.

1. Solicitation should not require multiple solicitation responses for multiple sites.
2. Because the city of San Francisco is so difficult to find available land area in, please make Daly City and East Bay locations Tier 1, these will service downtown San Francisco just as well.
3. Encouragement should be included for Combined Power and Fuel (CPF) hydrogen systems which address multiple emissions and generation issues.
4. The solicitation should not require 'backup' sites for each site submitted. It is hard enough to find a single good site, without the burden of also identifying a backup for each submittal.
5. Add the area on the east side of Oakland to tier 1 – like off of 680 heading toward the tunnel.

I note that there are a lot of comments that have already been submitted, including some by Linde, so encourage you to also review those for additional items that you might want to emphasize in your response to the draft PON.

Best regards,

**John Cornish**
