OCT. 22 2013

Comments on Proposition 39 - docket number 13-CCEJA-1

1. For purposes of calculating electricity consumption where there are existing solar arrays owned by the school district, will net consumption be acceptable? We maintain a detailed database that calculates monthly net consumption of electricity by combining data on generated kWh from solar panels, and consumption data from Southern California Edison Net Electric Metering bills.
2. If the cost of a single project exceeds that year's funding allocation, may larger projects be completed by using subsequent years' funding allocations?
3. Will water efficiency projects be considered for Proposition 39 funding?
