Subject: Docket Number 13-CCEJA-1 "Comments on Proposition 39"

Categories: Ready to Docket

We have three dependent charters that occupy space at 7 different sites and will receive funding allocations. Two charters fully occupy two separate campuses each. The third charter uses small classroom groups at three different school sites and are not separately metered (the classroom groups that is). Will the funds have to be divided between charters on a square foot basis? How do we measure and verify savings at the sites that only occupy a few classrooms at three sites that have no way of being metered separate of the campuses they're located on?
