

To Whom It May Concern:

I reviewed the proposed funding summary for natural gas fueling infrastructure and I have the following comment:

Entities that have had a positive experience with CNG demonstration program (2-3 vehicles) and desire to transition from Fuel Makers to full-scale CNG stations will have up-front capital requirements in the range of \$500k-\$800k per station assuming a 50% match (funding only covers half of the cost). Hence, proposed FY 2014-2015 natural gas infrastructure funding is woefully inadequate.
