

Comment on Docket #13-ALT-02
2014-2015 Investment Plan Update

To Whom It May Concern:

I reviewed the proposed funding summary for natural gas fueling infrastructure and I have the following comment:

There was a comment made during the meeting that the 2014-2015 funding for natural gas infrastructure was established based on applications from previous years. However, what is not taken into account is the number of agencies that *didn't* apply because the per project funds are insufficient and total funding for natural gas infrastructure is so low yet the number of applicants is so high.
