

OIL DEPLETION SAMPLER

Commissioners, may I respectfully suggest it's time
to embrace intellectual, and even artistic diversity
and allow oil depletion to

stand up and be counted, no longer forced back of
your brains' "city bus"? No thicket of reports to
read, just an open look at works usually kept safely
swept under the rugs at

1516 9th St, Sacramento, CA

World's Liquid Fuels Supply

Source: EIA, AEO2009

8

Figure 1: World oil production capacity to 2020
(Crude oil and NGLs, excluding biofuels)

Figure 10: *A field-by-field plot of Norwegian oil production, showing both the volume and temporal distribution of production for each field. Most of the giant fields peaked prior to 2000. Initially, their decline was offset by a massive expansion of development of smaller fields before the overall decline became unstoppable.*

Below are listed additional chicken little, tin hat wearing , social deviants you will also probably ignore:

Randy Udall, Oil Depletion Expert

U.S. Senator Mark Udall , past member House Peak Oil Caucus

U.S. Senator and Co-Founder of House Peak Oil Caucus, Tom Udall

Former Congressman Roscoe Bartlett, Co-Founder House Peak Oil Caucus

Billionaire Visionary and CEO of Virgin Airways Sir Richard Branson

“A major report funded by the [Virgin Airlines](#) owner and other British business leaders warned this week that the world is running out of oil and predicts shortages and price spikes as soon as 2015. A future of painful hikes in the cost of food, heating, and travel in a world unprepared for surging oil prices was forecast by the Industry Taskforce for Peak Oil and Energy Security.

"Don't let the oil crunch catch us out in the way that the credit crunch did," wrote Mr. Branson and other business executives in a forward to the report.

But it's not just the powerful backing from Branson and company that is suddenly giving heart to those warning of peak oil. They also point to signs that **even the British government is opening itself up to the possibility of an oil drought.**
