Subject: new docket number

Can you set up a docket 14-HERS-01 to receive the current application for confidentiality from Energy Analysis and Comfort Solutions related to the Data Registry application. The service list needs to include:

Joan Walter
Lea Haro
Rashid Mir
Tav Commins
Nelson Peña,

California Energy Commission

DOCKETED

14-HERS-01

TN 73259

JUN 26 2014

I will bring over the application and confidential materials thanks

Thanks

Jared,

Thank you for the clarification.

I'm not aware of any other docket number previously used for HERS provider application; therefore, we can use the suggested number, 14-HERS-01 as the number for future tracking.

Please add Joan Walter (Office Manager), Lea Haro (Supervisor), Rashid Mir (Lead Senior Engineer), Tav Commins (Engineer) and myself to access the confidentially application.

Thank you,

Nelson Peña, CEPE

In order to have a place to put the submission and track documents there needs to be a docket number so documents can be found and future submission that relate to the originally filed material can be saved into the same place.

Previous applications did have a docket number or were placed into an existing but related docket. Dockets are not limited to rulemakings. If this current submission relates to an existing docket we can stick it there. In addition having a docket allows dockets to notify the relevant staff that materials have come in. The confidentiality application and confidential materials would be docketed and staff would be notified. Those staff who need the materials would be able to obtain them from dockets. The application itself is not confidential.

Hello Jared,
Joan is planning to have me as the program manger.

However, I'm somewhat confused about having a docket number associated with this application request. Previous HERS Providers application have not had a docket number since we are not holding a rulemaking process or workshops to approve this provider. I do not believe any pro or con filings will be submitted during this process. If we do open a docket for tracking purposes then how would his confidentiality application be handled?
Thanks,

Can you answer this?

Joan

What staff did you want included on the service list to receive notice of filings?

Tav

Dockets received an application for confidentiality by Max McKinney for Energy Analysis and Comfort Solutions. There does not appear to be a docket number associated with this submission and none was included on the form. I assume we will need to create a new one. My understanding is that this filing relates to HERS so I can suggest we go with 14-HERS-01 unless there is an existing docket number you are aware of. Are you anticipating many filings to be coming in? What staff should be included on the service list to receive notice of filings? Thanks
