Oil by Rail Risk and Response Map

Gina Solomon, M.D., M.P.H.

Deputy Secretary for Science and Health

California Environmental Protection Agency Cal/EPA

Purpose:

1. Identify areas along rail routes with potential high vulnerability;
2. Identify the locations of emergency response teams relative to the vulnerable areas.

Rail Vulnerabilities: High Hazard Areas; Earthquake faults

Human Vulnerabilities: Population; Schools; Hospitals

Ecological Vulnerabilities: Water crossings; Sensitive species and habitats
