Subject: The DRECP

California Energy Commission

DOCKETED

09-RENEW EO-1

TN # 74091

0001/2014

I am writing to make a comment regarding the DRECP; it concerns me that during the five years since the Plan was initiated, rooftop solar technology has progressed significantly. Given these advances, rooftop solar should be brought forward for detailed analysis on its technological and economic merits, rather than being dismissed because it is not utility-scale production in the desert. To me, rooftop solar seems to be a “no brainer” rather than long distance transmission of solar power generated on disturbed desert lands which also requires further depletion of precious water resources at such desert sites.

Respectfully,
Donald J. Orahood
