Subject: DRECP NEPA/CEQA - Docket No. 09-RENEW EO-01

California Energy Commission
Dockets Office, MS-4
Docket No. 09-RENEW EO-01
1516 Ninth Street
Sacramento, CA 95814-5512
DRECP NEPA/CEQA,

I am writing in regards to DRECP NEPA/CEQA - Docket No. 09-RENEW EO-01.

This is a deeply flawed project that is truly environmentally destructive and which will saddle taxpayers with onerous debt which we don't want or need. The only people, this ill-conceived project will benefit are the people building it.

Two things are obvious, what we need is roof top solar, and why this is difficult is because the private utilities can't make enough money from them. It is ok for them to serve themselves and their stock holders, BUT NOT AT THE EXPENSE OF PUBLIC LAND.... which belongs to all.

Moreover, we already have enough roof-top real estate to use for roof-top solar. Maximizing roof-top solar could easily surpass this project's target of 20,000 megawatts, would leave the desert habitat unharmed, and would save taxpayers money.

The proposed project will need water we don't have, harm huge portions of native California, use technologies that are unproven in efficiency, and create a serious dust problem.

Please don't allow this ill-conceived plan to pass.

Best Regards,

Wes Hudson
