RE: Extend and waive application deadlines for RPS certification

Dear Executive Director,

Mogul Energy requests an extinction and waiver in connection with a RPS-I Certificate date stamp. Mogul a Qualified Facility is a 4 MW wind generation facility located at 16214 Tehachapi Willow Springs Road, Tehachapi CA 93561. Since 1989 all energy is purchased by Southern California Edison Co (SCE). In June of 2012 our original SCE Power Purchase Agreement expired and a new contract with SCE was signed. SCE has always taken the role as the "Qualified Reporting Entity and "Account Holder" (WREGIS #W493) for the green tag associated with the energy purchased. I was under the impression they would continue this role as they have the option in the new contract. Mogul takes full responsibility for this oversight and has since filed with the CEC a CEC RPS-I application, received certification and assigned a CEC RPS ID 60639A. A copy of the certificate was sent to Edison to give evidence we are in compliance, SCE responded they will be turning our contract over to their legal department for termination, because the date of the certificate is not within the 90 day period from the date the new contract was signed, June 14, 2012. We are a small power producer, if our contract was terminated, we are restricted from securing another contract for a period of 365 days, and the capital cost of securing a contract would cause Mogul to cease and exist. Your help in this matter is very much appreciated. If you require any information other than the following please contact me. The following is a list of Mogul Identification numbers from various agencies: FERC ID QF93-84-000, CEC RPS ID 60639A, RAP ID 6366, WREGIS ID-W493, and WDAT ID WTD888QCF

Sincerely

Cash Long, Managing Partner -- Mogul Energy Partners I, L.L.C.
