TO: Office of the Executive Director, California Energy Commission:

RE: Request of NRG Solar Kansas South LLC in Support of Process to Extend and Waive Deadlines for Renewables Portfolio Standard Certification -- Addendum

DATE: June 25, 2014

On May 14, 2014, NRG Solar Kansas South LLC ("Kansas South") submitted a request for extension and waiver of the its deadline to file an application for RPS certification as set forth in California Energy Commission ("Commission") Resolution No: 14-022-11. In addition to the letter and Attachment sent on that date, Kansas South is submitting the following *additional material (bold italics below)* to be inserted to that letter on p. 1:

For projects that missed this deadline through circumstances that constitute good cause, such as Kansas South, this potential loss of revenue is a disproportionate penalty weighed against the purposes stated above. ***For Kansas South, this amount may exceed \$1,000,000.*** Large amounts of compensation may be lost for generation that would have clearly qualified for RPS eligibility, but for the deadline requirement. Therefore, it is appropriate and necessary for the Executive Director to find that Kansas South qualifies for an extension and waiver.

Let us know if you need further information.
