California Energy Commission

**DOCKETED**

**15-MISC-01**

TN # 74657

Regarding: Docket #15-MISC-01

I support the petition for Emergency review of 2013 California Energy Code filed under CEC Docket # 15-MISC-01.

I have been doing Title 24 Energy Calculations since 1979 and have worked with every version of the state energy code. The new 2013 Energy Standards are confusing and excessively complicated. In my area, Building Department officials are incapable of checking energy calculations. As a result, the calculations are not being checked. Mandatory requirements of the 2013 Energy Standards are not being enforced.
