Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way.

With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

\* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.

\* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.

\* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.

\* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.

\* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.

\* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Clyde Hiland  
1079 E Tokio Rd  
Ritzville, WA 99169-9761

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

I am certain that you have received many of these letters, so I will not repeat the list of particular areas that should be protected.

Rather I wish to list two problems I have with renewable energy:

1. I have read of a solar energy plant which reflects and focuses solar heat and light across a large area to a centralized energy generation or dispersal place, and that this plant roasts many birds unfortunate enough to fly through it. I would like to see such a plant made more safe for the birds, perhaps be being surrounded by high fences, maybe by focusing the solar energy through large pipes (like water through sewer tunnels), or hopefully by somebody's better idea?
2. I have read that many wind farms kill dozens of birds every day as they fly into the slow appearing blades (but the tips of these blades are actually moving at quite a high speed). Again, I hope that somebody has a good idea to make these wind farms more bird-friendly. Possibly some sort of huge netting structure could surround each windmill, similar to the screens around household fans? I realize that this would increase the cost and decrease the efficiency, but the destruction of wildlife,

especially  
endangered species is one of the main (only?) arguments the  
fossil  
fuel polluters have against wind energy.

Thanks for considering this important issue.

Sincerely,

Dr. Stan Benton

- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

My wife and I have visited 26 of our national parks and are currently watching the Ken Burns documentary on Our National Parks: America's Best Idea. We need to preserve all our public lands and the wildlife that lives there in perpetuity.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Joseph Stasey  
13558 Water Crest Dr  
Fishers, IN 46038-5546

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Diana Van Ormer  
16394 Avenida Venusto Unit A

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Beatriz Pallanes  
2514 W Ligan Ln  
Santa Ana, CA 92704-3131

Dear Mr. Beale,

02/20/2015  
USA INTERFACE: Lions' Share

National Hello!

Please Bear with me...

The Lions' Share is the public domain of The United States of America USA. Originally composed of The United States National Park Service NPS, The United States Department of the Interior, The United States Forest Service USFS, and The Bureau of Land Management BLM. The Lions' Share is expanding to encompass the National Parks Conservation Association NPCA, the Natural Resources Defense Council NRDC, the United States Department of Agriculture USDA, the Department of Natural Resources DNR, the Civilian Conservation Corps CCC, also the United States Fish and Wildlife Service USFWS.

Directives include scouting for state parks that are ready to be nationalized. Renaming state parks and national parks for our One Nation Under God. Examples are "Death Valley" NPS being renamed as "Deep Valley" or "Depth Valley"; "Devils Postpile" NPS being renamed as "Gods' Postpile"; "Devils Island" of Apostle Islands National Lakeshore NPS being renamed "Gods' Island"; "Devil's Lake State Park" WI being nationalized into "Gods' Lake National Park"; Many more!

Thanks for bearing within The Lions' Share.

Lionheartedly,  
NPCA Advocate,  
Lions' Share Nationalist,  
Mr. Jason Robert Van Pelt

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Sheri Cutright  
87 Balearics Dr  
St Augustine, FL 32086-1854

- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Elizabeth Mendoza  
1816 N Gramercy Pl  
Los Angeles, CA 90028-5880

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

The desert is a beautiful but fragile environment. I hope you will take that into account when reviewing alternative energy project sites.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Peter Pitsker

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. D. Neimark  
6018 N Oakley Ave  
Chicago, IL 60659-5237

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Elaine Livesey-Fassel  
10387 Glenbarr Ave  
Los Angeles, CA 90064-4523

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Miss Vanessa Yataco  
4321 Mount Vernon St Apt 5  
Houston, TX 77006-5831

- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Elora Hartmann

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Valerie Gaster
