Cc: Energy - Docket Optical System
Subject: Docket No. 15-BSTD-01 - Comments from A.O. Smith

Importance: High

California Energy Commission

DOCKETED

15-BSTD-01

TN # 75376

MAR 09 2015

On behalf of A. O. Smith Corporation we would like to submit a comment on the proposed 45-Day Language Express Terms as shown below.

Under Subchapter 9; Section 150.2(b)(1)(G) would require manual control pumps to be used for Demand Recirculation Systems for gas water heating systems. We request that this requirement be clarified to the extent that a manual pump used in such systems can be integral or external to a gas water heater.

Thank you.

David C. Bixby
