**CALIFORNIA ENERGY COMMISSION**

Attention: Docket No. 15-BSTD-01

Dockets Office

1516 Ninth Street, MS-4

Sacramento, CA 95814

I am writing in support of proposed changes to title 24 as it pertains to Lighting Retrofits.

Exceptions to the code for work which improves the energy efficiency of existing or replacement fixtures are crucial for the continued health of the lighting retrofit industry in California which has delivered so much energy efficiency in the past.

In particular, I support:

EXCEPTION 2 to Section 141.0(b)2I. "For work consisting of only luminaire replacements per ii above, where replacement luminaires have at least 20 percent lower power consumption compared to the original luminaires."

EXCEPTION 2 to Section 141.0(b)2J. "Replacement of luminaire components where the modified luminaires have at least 20 percent lower power consumption compared to the original luminaires."

I also support adding an exception for exterior fixture replacements such that code is not triggered if replacement luminaires have at least 40 percent lower power consumption compared to the original luminaires.

Sincerely,

A handwritten signature in black ink that reads "Matt".

Matt Tracy
