Re: Comments of Ecology Action regarding Title 24 15 -Day Language and 2013 Code Impacts Data

NLCAA is in favor of rolling back the lighting control and acceptance test requirements for alterations and modification of both indoor and outdoor luminaries of existing buildings.

The continual advancement in lighting technology (LED) can be applied not only in previous lighting retrofit projects, but all existing facilities. Adding the cost of lighting controls will eliminate the major part of the market. There is no way to measure the lost of energy savings by adding cost lighting controls.

Again NLCAA is an approved Lighting Control Acceptance Test Technician Certified Provider, and supports the retrofit industry.
