Subject: Whole House HERS OII 12-HERS-01

California Energy Commission DOCKETED 12-HERS-01
TN # 75988 JUN 17 2015

I believe it is important to align HERS (asset) rating scores with the rest of the country.

I believe it is very worthwhile to introduce and allow additional software tools to the market to use. I have to assume that among the software options will be one or more that also ties to CA Title 24 code compliance.

I think it is critical that what ever tools are allowed and used, the variance/discrepancy of results is reduced. There is NO valve to a HERS score if the score is relatively bogus depending on how a rater inputs the data etc.

Thank you.
