TITLE 24, PART 6, SECTIONS 141.0(b)2I, J, K, and L**

**California Energy Commission
Docket No. 15-BSTD-01**

California Energy Commission

DOCKETED

15-BSTD-01

TN 76033

JUL 13 2015

The California Energy Commission is considering adopting revisions to the California Building Energy Efficiency Standards (Standards), codified in Title 24, Part 6, Sections 141.0(b)2I, J, K, and L of the California Code of Regulations. The Standards (also known as the California Energy Code) establish minimum levels of energy efficiency for newly constructed buildings and for additions and alterations to existing buildings.

Energy Commission staff prepared an Initial Study to document the potential impacts of the proposed revisions to these Sections and has analyzed the potential environmental impacts that are likely to result if the revisions are adopted. Staff considered air emissions, water use, indoor air pollution, and changes in materials use, finding the impacts in these areas to be less than significant.

In addition, implementing the proposed lighting alteration provisions of the 2016 Standards will reduce statewide annual electricity consumption, and consequently reduce criteria air pollutant and greenhouse gas emissions. Therefore, staff recommends that the Energy Commission approve the Initial Study and adopt a Negative Declaration based on its contents.

Public Comment Period

The public comment period for this Initial Study and Proposed Negative Declaration will be from July 10, 2015, through 10:00 a.m. on August 10, 2015.

Written comments must be emailed to Docket@energy.ca.gov or mailed or delivered to the following address (emailing is preferred):
