**Agenda**

Notice is hereby given that the California Energy Commission proposes to adopt revisions to the nonresidential lighting alteration provisions of the Building Energy Efficiency Standards in the California Code of Regulations, Title 24, Part 6, Sections

141.0(b)2I, J, K, and L. The proposed amended standards would go into effect on January 1, 2017, following approval of the California Building Standards Commission.

The Energy Commission will also consider approving the Initial Study prepared for the proposed changes to these Sections and adopting a Negative Declaration based on the Initial Study, pursuant to the California Environmental Quality Act, Public Resources Code section 21000 et seq. (CEQA).

## **Background**

In February 2015, the Energy Commission published a Notice of Proposed Action (NOPA) regarding these proposed revisions to the California Energy Code and CALGreen. In the NOPA, the Energy Commission listed April 8, 2015, as a potential adoption date for the proposed language, which was made available for public comment for 45 days as required by law. The proposed language is also known as the “45-Day Language” or “45-Day Express Terms”. The NOPA also stated that:

A hearing before the full Energy Commission, for possible final adoption of the 45-Day Language Express Terms will be held on the date below [April 8, 2015]; however, if the Energy Commission decides to make substantive changes to the Express Terms through 15-Day Language, the public hearing may be continued to a later noticed date.

Staff has considered comments submitted during the 45-day public comment period and have made substantive and sufficiently related changes to the Draft Express Terms based on these comments. The Energy Commission subsequently released a revision of the Draft Express Terms for 15-day public review and comment. On June 10, 2015 the Energy Commission adopted all but the proposed update to the nonresidential lighting alteration provisions (Section 141.0(b)2I-L). In response to commenters’ identified concerns related to the proposed amendments to the provisions in Section 141.0(b)2I-L and the additional documents relied upon, the Energy Commission further revised the proposed amendments for these Sections and provided notice and further opportunity for public comment on July 10. The Energy Commission has since received commentary on that draft, and made additional revisions based on the received public comments, shown in the revised 15-Day Language published with this Notice.

The 15-Day Language, all documents relied upon, and the Initial Study can be obtained from the contact persons designated below or from the Energy Commission website at: [www.energy.ca.gov/title24/2016standards/rulemaking/](http://www.energy.ca.gov/title24/2016standards/rulemaking/).

Should the Energy Commission determine that substantial and sufficiently related changes to the 15-Day Language are needed, this item will be continued to a future public hearing, a revised set of 15-Day Language documents will be prepared, and a future public hearing will be separately noticed.

## Public Comment

The public comment period for the 15-Day Language and additional documents relied upon is from October 27, 2015, through 4:00 p.m. on November 10, 2015.

Written comments should be submitted to the Dockets Unit by 4:00 p.m. on the final date of the public comment period. Written comments will also be accepted at the hearing, but are encouraged to be submitted in advance. All written comments will become part of the public record of this proceeding. Additionally, written comments may be posted to the Energy Commission's website for the proceeding.

The Energy Commission encourages comments by email and electronic submission, up to 5 MB. Please include your name and any organization name. Comments should be in a downloadable, searchable format such as Microsoft® Word (.doc) or Adobe® Acrobat® (.pdf). For additional information, see Standing Order re: Proceedings and Confidentiality Procedural Requirements For Filing, Service and Docketing Documents with the Energy Commission, available at:
