**Subject:** RE: URGENT: T24 Stakeholder Update - Action Requested

Commission,

I cannot believe educated people as yourselves cannot grasp the concept that there are people / companies who want to save energy but the Commission is putting up so many roadblocks that they throw up their hands as say "forget it". Jobs and energy lost for words on a paper.

Millions of kilowatt hours wasted by "YOU" the Commission just because you cannot agree to language on a paper.

Energy wasted, thousands of jobs lost and millions in construction spending lost because of language on a paper.

This is by far incomprehensible.

Put out a Directive so that a person can change out a HID parking lot fixture with LED fixture there by saving 70% and not have to go thru the painstaking, miserable, disconsolate parts of the permit process.

Please, I implore you, change the language or send out a directive NOW!

Thank you,

Andy Swart
