Subject: CSPTC Annual Report (Section 10-103-Bd of the 2013 Standards)

California Energy Commission,

The California State Pipe Trades Council (CSPTC) was approved as an Acceptance Test Technician Certification Provider for Non-Residential Mechanical Acceptance Test Technician and Employer on September 14, 2016.

As of September 14, 2016, U.A. Locals throughout California have been submitting applications for Acceptance Test Technician and Acceptance Test Technician Employer Certification Training Center.

We have been reviewing these applications and all applications have been approved. Upon approval of the applications, each Local Union Training Center will begin teaching the curriculum outlined in the application submitted by the California State Pipe Trades Council and approved by the California Energy Commission. We are looking to have our first graduation class by December 2016.

The CSPTC has also been pro-active in seminars being conducted to bring contractors up to speed on the title 24 CA Energy Code regarding Acceptance Test Technician Certification Provider for Non-Residential Mechanical Acceptance Test Technician Employer. Independent oversight of the certification processes and procedures to be administered by NITC (National Inspection Testing Certification) has been included in these seminars.

Sincerely,

Gregory A. Partch
Executive Director
