# CALCTP ACCEPTANCE TEST TECHNICIAN CERTIFICATION PROVIDER ANNUAL REPORT

PERIOD ENDING SEPTEMBER 30, 2016

Prepared by: The California Advanced Lighting Controls Training  
Program (CALCTP)

Submitted by: Mark V. Ouellette, CALCTP Administrator on Behalf of the CALCTP Board  
November 4, 2016

## Lighting Controls Acceptance Test Technician Provider (LCATTP) Annual Report

### **Introduction**

The 2013 California Building Energy Efficiency Standards (“2013 Code”) requires lighting control acceptance tests to be performed by trained and certified Lighting Control Acceptance Test Technicians.<sup>1</sup>

The California Advanced Lighting Control Training Program (CALCTP) received interim approval as a lighting control acceptance test technician provider (LCATTP) on April 1, 2014 and final approval as a LCATTP on November 17, 2014. Furthermore, CALCTP demonstrated that the industry threshold certification of at least 300 lighting control acceptance test technicians was met and approved by the California Energy Commission on June 16, 2014.

Pursuant to 2013 Code tit. 24 Part 6, § 130.4, subd (d) the LCATTP shall provide an annual report to the CEC summarizing the certification services provided over the reporting period and to date. As outlined in an email dated October 3, 2016 from Ms. Veronica Martinez of the CEC, this report is to include the following elements:

1. The total number of Acceptance Test Technicians and Employers certified by the ATTCP during the reporting period and to date.
2. Summarize the number of projects and acceptance tests performed by permitting agency.
3. Report any administrative actions taken by the ATTCP to correct problems with Acceptance Test Technician field performance.
4. A signed certification that the ATTCP has met all requirements for this program as specified in their application as approved by the Energy Commission.
  - o Note any modifications or deviations from the approved application as necessary.

In addition, the email indicated the 2016 Annual Report was to be submitted to the Commission by November 7, 2016. This annual report covers the timeperiod from October 1, 2015 to September 30, 2016. The remainder of this report and appendices will address the four items outlined by Ms. Martinez.

#### **I. The total number of Acceptance Test Technicians and Employers certified by the ATTCP during the reporting period and to date.**

As of September 30, 2016, CALCTP has certified 1,436 Lighting Controls Acceptance Test Technicians to perform the acceptance tests in Building Energy Efficiency Standards, Section 130.4. This includes 493 Lighting Controls Acceptance Test Technicians certified from October 1, 2015 through September 30, 2016. Each of these technicians has met the minimum pre-qualifications requirements, completed the classroom and hands-on training requirements and passed the certification exam. These 1,436 certified technicians include electrical contractors, certified general electricians, lighting designers, professional engineers, certified commission professionals, and lighting control manufacturer representatives.

Attached as Exhibit A is a list of the names and certification identification numbers for each of the CALCTP-AT certified Lighting Controls Acceptance Test Technicians.

---

<sup>1</sup> Cal. Code Regs., tit. 24 Part 6, § 130.4, subd (c).

The CALCTP Quality Assurance program outlined in our application followed an audit program recommendations of maintaining a goal of conducting enough quality assurance audits during the first three years of the program to have a 98% confidence level that all acceptance test assessments are done correctly. CALCTP projected that at least 250 projects would be conducted and a 98% percent confidence interval would require that 12% of the projects would be audited. Of the 4,232 projects conducted during the 2016 Annual Report period, CALCTP’s Quality Assurance provider, ICF, conducted 329 quality assurance audits or 7.7%. The variance was due to staff turnover and adjustments needed in staffing levels to meet the number of acceptance tests being conducted.

**III. Report any administrative actions taken by the ATTCP to correct problems with Acceptance Test Technician field performance.**

As outlined in our initial application, CALCTP is using the following process to conduct quality assurance on its projects.

**Failed Item versus a Failed Test**

A “failed Item” constitutes a category of failure on the part of the lighting controls acceptance test technician such as: failure to ensure appropriate documentation is available and complete; failure to conduct automatic daylight controls tests, lighting shut-off control tests, outdoor lighting control tests or demand responsive controls test; failure to verify power adjustment factors are correct when claimed; or failure to confirm installed lighting controls are certified to the California Energy Commission.

A “failed test” occurs when at least one of the threshold specifications is not met during the testing and inspection process. “Threshold Specifications” is a set of specific pass/fail criteria for each lighting control device or system requiring acceptance testing. Threshold specifications are established for minimum performance levels necessary to pass acceptance tests as outlined in the California Advanced Lighting Controls Training Program—Acceptance Test Technician Course.

**Potential Failed Items**

A failed test would include one or more of the following items:

- Occupant Sensors serving small zones in a large open office plan for Power Adjustment Factor (PAF)
  - Technician did not complete the automatic shutoff controls acceptance tests for occupancy sensors serving small zones in a large open office plan or properly document all results on the acceptance certification NRCA-LTI-02-A.
  - Incorrect power adjustment factor (PAF) is documented on Certificate of Acceptance NRCA-LTI-02-A (Part 5).
  - Zones, where a PAF is claimed, are not separately listed on Certificate of Acceptance NRCA-LTI-02-A (Part 5).
  - Occupant sensors are triggered by movement outside their assigned zone.

- Occupant sensors are not listed in the CEC appliance database or approved for use by the CEC.
- Energy Management Control System (EMCS) functioning as an indoor lighting control that requires an acceptance test (per NRCI-LTI-02-E)
  - Technician did not complete the automatic shutoff controls acceptance tests for the type of control the EMCS is designed to replace or did not properly document all test results on the acceptance certificate NRCA-LTI-02-A.
  - EMCS was not tested once for each type of indoor lighting control it is designed to replace.
  - If the EMCS acts as an automatic time-switch control, a manual override (manual switch) is not installed in each indoor area served by the EMCS.
  - If the EMCS acts as part of an occupancy-based lighting control, the lighting system under its control turns OFF no later than 30 minutes after the space becomes vacant.
- Automatic Daylighting Controls
  - Technician did not complete the automatic daylighting controls acceptance tests or properly document all results on the acceptance certificate NRCA-LTI-03-A.
  - All required daylit zones are not shown on building plans.
  - Completed acceptance test document NRCA-LTI-03-A does not accurately account for all daylit control zones.
  - Luminaires outside the daylit zone are controlled by the same automatic daylighting control as luminaires inside the daylit zone.
  - Test results from the No Daylight Test, Full Daylight Test and Partial Daylight Test are not documented on acceptance test form NRCA-LTI-03-A.
  - Automatic daylighting control device is not listed in the CEC appliance database or approved for use by the CEC.
- Indoor Shut-off Controls – Automatic Time Switch Control
  - Technician did not complete the automatic time switch control acceptance tests and document the results on acceptance certificate NRCA-LTI-02-A.
  - Device is not programmed with a weekend schedule that matches the owner’s operating plan or other programming guidelines provided to the technician for the space/building.
  - Device is not programmed with a holiday schedule that matches the owner’s operating plan or other programming guidelines provided to the technician for the space/building.
  - Device override time limit is greater than 2 hours.
  - All individual control zones (or sampled zones when using a sampling method) are not documented on the acceptance certificate NRCA-LTI-02-A.
- Demand Response Controls
  - Technician did not complete the demand responsive lighting controls acceptance tests and document the results on the acceptance certificate NRCA-LTI-04-A.
  - Technician did not confirm the maximum DR reduction is less than 50% of full output.

- DR controls are not capable of receiving a demand response signal from a utility or 3<sup>rd</sup> party aggregator.
- Outdoor Controls
  - Technician did not complete the outdoor lighting controls acceptance tests or document results on the acceptance certificate NRCA-LTO-02-A.
  - Technician did not verify that outdoor lighting was OFF during the day.
  - Outdoor lighting is not OFF during the day.
  - Technician did not test all outdoor motion sensors.

**Additional Oversight For Failing a Quality Assurance Audit**

If a lighting controls acceptance test technician and/or a lighting controls acceptance test employer has failed either a paper quality assurance audit or an on-site-quality audit, both the CALCTP-AT Technician and the CALCTP-AT Employer will receive additional quality assurance oversight. AT-Technicians and employers that fail a quality assurance site visit are subject to the following remedial actions.

| Result  | % of Projects Audited  | Action That Will Be Take  |
|---|--|---|
| Failed Either a Paper or On-Site Quality Assurance Audit                | 50% of Future Projects Audited until they have passed 2 audits | On-Site Quality Assurance Audit Only                                    |
| Failed a Second Quality Assurance Audit, the Second is an On-Site Audit | 100% of Future Projects Audited, until passed 4 audits         | On-Site Quality Assurance Audit Only                                    |
| Failed a Third Quality Assurance Audit, while still in the failed pool. |  | Recommendation sent to CALCTP Board to Terminate from CALCTP-AT Program |

Of the 329 projects reviewed by CALCTP under its quality assurance program, twenty projects were deemed to have failed results requiring remedial action. Each of those eight projects involved an on-site audit that found a test result that was not able to be replicated. Three of the failed test results involved an automated demand response control, four of the failed test results involved automatic daylight controls, and one of the failed test results involved an automatic time switch. The test results were corrected and the seven technicians were placed into the first remedial action category requiring 50% of future projects to be on-site quality assurance tested until they have passed 2 audits. So far, only one of the technicians failed a second quality assurance test and has been placed in the 3<sup>rd</sup> and final tier of auditing. The technician and employer are aware if there is another failed audit the technician will lose their certificate. ICF has met twice to provide the lighting control acceptance test technician with additional training.

In addition, paper audits identified 11 projects that erroneously failed to check the box verifying that the occupancy sensor was on the Title 20 list of approved equipment. The technicians informed us that they

missed this item due to its location on the form. These errors were corrected and CALCTP determined that the errors did not rise to a level requiring further remedial action. CALCTP has sent out a reminder to all technicians noting the frequency of this error.

**IV. A signed certification that the ATTCP has met all requirements for this program as specified in their application as approved by the Energy Commission.**

No modifications or deviations from the approved application as necessary have been developed by CALCTP since final approval as an LCATTP on November 16, 2014. However, CALCTP has developed a 2016 edition of Title 24 lighting controls acceptance test technician and lighting controls acceptance test employer certification and recertification curriculum that was approved by the CEC on October 19, 2016.
