### **Background**

Assembly Bill 118 (Núñez, Chapter 750, Statutes of 2007) created the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP). The statute authorizes the California Energy Commission to develop and deploy alternative and renewable fuels and advanced transportation technologies to help attain the state's climate change policies. Assembly Bill 8 (Perea, Chapter 401, Statutes of 2013) re-authorizes the ARFVTP through January 1, 2024, and specifies that the Energy Commission allocate up to \$20 million per year (or up to 20 percent of each fiscal year's funds) in funding for hydrogen station development until at least 100 stations are operational. The Energy Commission has an annual ARFVTP budget of approximately \$100 million and provides financial and technical support for projects that:

- Reduce criteria and toxic air pollutant emissions from vehicles.
- Reduce the use of and dependence on petroleum transportation fuels, and increase the use of alternative and renewable fuels and advanced vehicle technologies.
- Produce sustainable alternative and renewable low-carbon fuels in California.
- Expand alternative fueling infrastructure and fueling stations available to the public, existing fleets, public transit, and transportation corridors.
- Improve the efficiency, performance, and market viability of alternative light-, medium-, and heavy-duty vehicle technologies.

- Retrofit medium- and heavy-duty on-road fleet and nonroad freight vehicles to alternative technologies or fuel use.
- Offer incentives for the purchase of alternative fuel vehicles.
- Establish workforce training programs and conduct public outreach on the benefits of alternative transportation fuels and vehicle technologies.
- Support local and regional planning for zero-emission vehicle and fueling infrastructure deployment.

Statute requires the Energy Commission to annually update an investment plan that communicates the Commission's strategic vision; determines the funding priorities and opportunities for the upcoming fiscal year; and provides an analytical rationale for proposed expenditures. The investment plan update also highlights and explains the rationale for any year-to-year changes to the ARFVTP strategy and funding priorities. Projects funded by the Commission under ARFVTP must be consistent with the priorities established in the plan.

The current investment plan update (the *2019-2020 Investment Plan Update*) posted on January 10, 2019. This document is available online at <https://www.energy.ca.gov/altfuels/2018-ALT-01/documents/>.

Statute also requires the Energy Commission to convene and consult with an advisory committee to help develop each investment plan update. The advisory committee is comprised of representatives of fuel and vehicle technology consortia; labor organizations; environmental organizations; community-based justice and public health organizations; recreational boaters; consumer advocates; academic institutions; workforce training groups; and private industry. The advisory committee also includes representatives from various state agencies: the Natural Resources Agency; the California State Transportation Agency; the Labor and Workforce Development Agency; and the California Environmental Protection Agency.

## Public Comment

**Oral Comments.** Public comments will be accepted during the meeting. Comments may be limited to three minutes per speaker. Any comments will become part of the public record in this proceeding.

**Written Comments.** Written comments should be submitted by 5:00 p.m. on February 22, 2019. If you wish to provide comments on these or related topics, you may do so by using the Energy Commission e-commenting feature for docket 18-ALT-01, available at <https://www.energy.ca.gov/altfuels/2018-ALT-01/documents/>. A full name, email address, comment title, and either a comment or an attached document (.doc, .docx, or .pdf format) is required. After a challenge-response test used by the system to ensure that responses are not generated by a computer, click "Agree & Submit Your Comment" to submit the comment to the Energy Commission Dockets Unit.

Please note that written comments, attachments, and contact information included within the written comments and attachments (e.g., your address, phone, email) become part of the viewable public record.

You are encouraged to use the electronic filing system, described above, to submit comments. If you are unable to submit electronically, a paper copy of your comments may be sent to:
