CALCTP ACCEPTANCE TEST TECHNICIAN CERTIFICATION PROVIDER ANNUAL REPORT

PERIOD ENDING DECEMBER 31, 2018

Prepared by: The California Advanced Lighting Controls Training
Program (CALCTP)

Submitted by: Mark V. Ouellette, CALCTP Administrator on Behalf of the CALCTP Board
February 1, 2019

Lighting Controls Acceptance Test Technician Certification Provider (LCATTCP) Annual Report

Introduction

The 2013 California Building Energy Efficiency Standards (“2013 Code”) requires lighting control acceptance tests to be performed by trained and certified Lighting Control Acceptance Test Technicians.¹

The California Advanced Lighting Control Training Program (CALCTP) received interim approval as a lighting control acceptance test technician certification provider (LCATTCP) on April 1, 2014 and final approval as a LCATTCP on November 17, 2014. Furthermore, CALCTP demonstrated that the industry threshold certification of at least 300 lighting control acceptance test technicians was met and approved by the California Energy Commission (CEC) on June 16, 2014.

Pursuant to 2013 Code tit. 24 Part 6, § 130.4, subd (d) the LCATTCP shall provide an annual report to the CEC summarizing the certification services provided over the reporting period and to date. As outlined in an email dated October 6, 2017 from Ms. Veronica Martinez of the CEC, this report is to include the following elements:

1. The total number of Acceptance Test Technicians and Employers certified by the ATTCP during the reporting period and to date.
2. Summarize the number of projects and acceptance tests performed by permitting agency.
3. Report any administrative actions taken by the ATTCP to correct problems with Acceptance Test Technician field performance.
4. A signed certification that the ATTCP has met all requirements for this program as specified in their application as approved by the Energy Commission.
 - o Note any modifications or deviations from the approved application as necessary.

This annual report covers the time period of January 1, 2018 to December 31, 2018. In addition to the report, as previously requested CALCTP is providing a list of the acceptance test projects completed during calendar year 2018.

I. The total number of Acceptance Test Technicians and Employers certified by the ATTCP during the reporting period and to date.

As of December 31, 2018, CALCTP has certified 1,804 Lighting Controls Acceptance Test Technicians to perform the acceptance tests in Building Energy Efficiency Standards, Section 130.4. This includes 94 Lighting Controls Acceptance Test Technicians certified from January 1, 2018 through December 31, 2018. Each of these technicians has met the minimum pre-qualifications requirements, completed the classroom and hands-on training requirements and passed the certification exam. These 1,804 certified technicians include electrical contractors, certified general electricians, lighting designers, professional engineers, certified commission professionals, and lighting control manufacturer representatives. Of these certified acceptance test technicians 966 have maintained their certification and are updated to the 2016 Code.

¹ Cal. Code Regs., tit. 24 Part 6, § 130.4, subd (c).

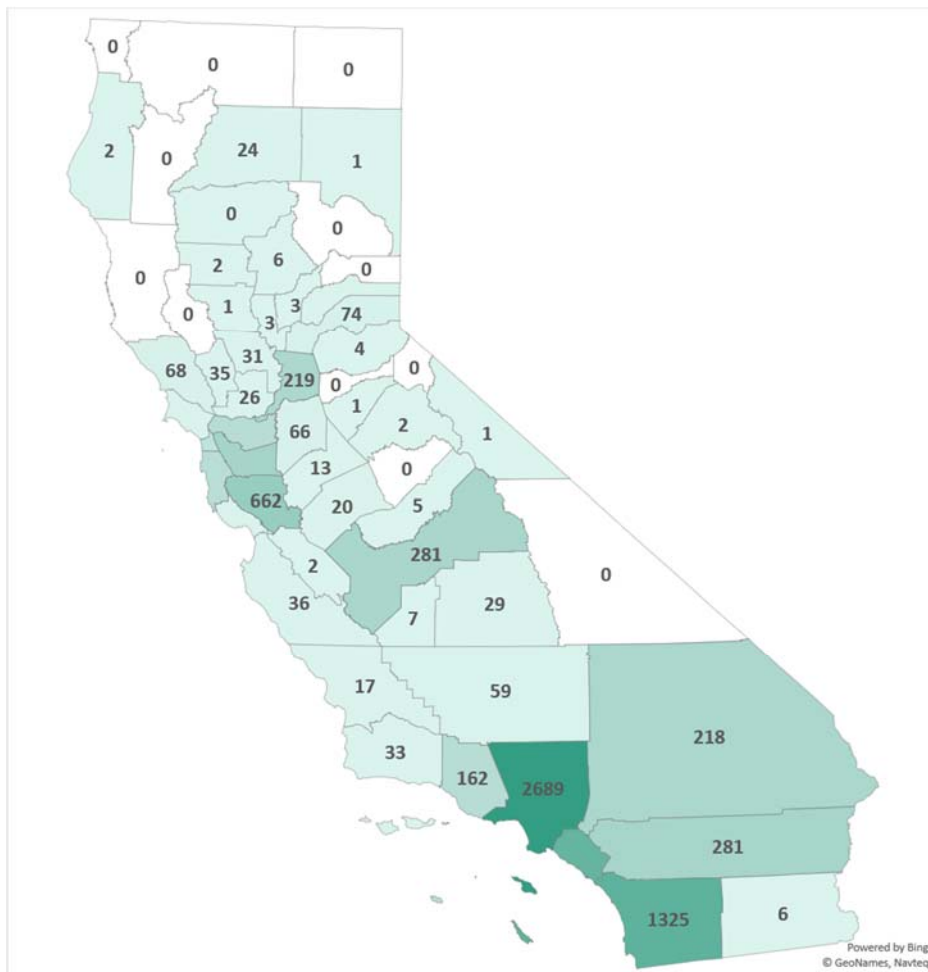

Attached as Exhibit A is a list of the names and certification identification numbers for each of the active CALCTP-AT certified Lighting Controls Acceptance Test Technicians.

Attached as Exhibit B is a list of the names and certification identification numbers of each of the 539 businesses that are currently certified as Lighting Controls Acceptance Test Technician Employers. This includes the 22 Lighting Controls Acceptance Test Employers certified from January 1, 2018 through December 31, 2018. These 539 employers are comprised of electrical contractors, professional engineers, architectural firms, and commissioning agents.

II. Summarize the number of projects and acceptance tests performed by permitting agency.

All CALCTP AT Employers are required to provide copies of the lighting control acceptance test conducted within 48 hours of completion. Through September 30, 2017, CALCTP Lighting Control Acceptance Test Employers and Lighting Control Acceptance Test Technicians Conducted 24,400 acceptance test technician projects including 8,913 projects during 2018 Annual Report period. Exhibit C below is a representative of the location by County of the 8,913 projects. The information is also provided in a separate excel file as part of this submission.

8,913 CALCTP Lighting Control Acceptance Test Projects During 2018 Annual Reporting Period

Of the 8,913 projects conducted during the 2018 Annual Report period, CALCTP's Quality Assurance provider, ICF, conducted 375 quality assurance audits or 4.2%. 87 of the 375 audits were on-site audits. Of the 24,400 completed acceptance tests since July 1, 2014, ICF has conducted 1,204 audits or 4.9% of all projects including 229 on-site audits.

While the number of CALCTP projects has almost doubled from the previous year there is still a considerable number of Authority Having Jurisdiction not requiring acceptance testing. CALCTP averages at least 5 to 6 complaints a week from acceptance test technicians regarding various enforcement concerns. As shown by the graph above, there are numerous counties where there has been zero compliance with the requirements to use certified acceptance test technicians. Even in counties where certified acceptance tests are being hired, compliance is inconsistent. CALCTP has received numerous complaints from acceptance test technicians that they have been hired to perform acceptance tests on projects, only to be told that his or her services are not needed because the building inspector does not require evidence of Title-24 compliant acceptance testing.

In addition to failing to require lighting control acceptance tests, CALCTP receives numerous complaints that local jurisdictions are approving non-compliant lighting systems. Under the current regulations, acceptance test technicians can only test what they have been hired to test and do not document Title 24 compliance issues. CALCTP supports requiring or authorizing acceptance test technicians to review compliance documents and to report non-compliant projects to the authority having jurisdiction and/or the Commission.

III. Report any administrative actions taken by the ATTCP to correct problems with Acceptance Test Technician field performance.

Of the 375 projects reviewed by CALCTP under its quality assurance program, 67 projects had a failed item or failed result. Of these, 54 were a failed item and 13 were a failed test which were deemed to have failed results requiring remedial action. The test results were corrected and the technicians of these projects were placed into the first remedial action category requiring 50% of future projects to be on-site quality assurance tested until they have passed 2 audits. So far, only 6 of the technicians failed a second quality assurance test and has been placed in the 3rd and final tier of auditing. The technicians and employers are aware if there is another failed audit the technician will lose their certificate. ICF has met twice to provide the lighting control acceptance test technicians with additional training.

IV. A signed certification that the ATTCP has met all requirements for this program as specified in their application as approved by the Energy Commission.

The only modifications or deviations to the CALCTP application approved by the CEC on November 16, 2014 are the revisions to the certification and recertification curriculum for acceptance test technicians and acceptance test employers that were developed to meet the new and amended acceptance test

requirements set forth in the 2016 edition of Title 24. These revisions to the curriculum were approved by the CEC on October 19, 2016. By the signature below, CALCTP certifies that it meets all requirements for this program as specified in its application and its amendments to its application approved by the CEC.
