**Notice of Availability of the  
Renewables Portfolio Standard  
2014-2016 Retail Sellers Procurement Verification  
Commission Final Report (Revised)  
CEC-300-2018-007-CMF REV/Docket No. 18-RPS-02**

The *RPS 2014-2016 Retail Sellers Verification Report* provides the results of the California Energy Commission staff's verification of renewable energy procurement claims submitted by retail sellers for Compliance Period 2 of the Renewables Portfolio Standard (RPS), which covers the years 2014-2016. The Energy Commission adopted the *Renewables Portfolio Standard 2014-2016 Retail Sellers Procurement Verification Commission Final Report (RPS 2014-2016 Retail Sellers Verification Report)* at its November 7, 2018, business meeting and authorized the Executive Director, or his designee, to finalize the report and transmit it to the California Public Utilities Commission (CPUC). The report was subsequently transmitted to the CPUC and made available on the Energy Commission's website.

Energy Commission staff subsequently identified non-substantive errors in the report that have been corrected in a revised version, which is now available at:

[https://www.energy.ca.gov/portfolio/documents/rps\\_verification.html](https://www.energy.ca.gov/portfolio/documents/rps_verification.html)

The following is a summary of the non-substantive changes made in the revised version:

- Cover page and credits updated to reflect the document as a revised version, added the date of the revision, and reference current state and agency officials.
- Appendix A, page A-72, Table A-17, rows 17 through 22, updated to properly associate generation amounts for each year to the correct facility. The original verification report misidentified generation from Grassland 3 (RPS ID 62319) facility with the annual line items for Grassland 4 (RPS ID 62320) facility and misidentified generation from the Grassland 4 (RPS ID 62320) facility with the annual line items for Grassland 3 (RPS ID 62319) facility. There is no net change in procured generation amounts. All changes to procured generation values are shown in strikethrough and underline format.
- Appendix A, Table A-17, Page A-49, row 26, and Page A-50, row 1, was updated to add procured generation from Friant Madera (RPS ID 62380) facility and Friant River Outlet (RPS ID 62381) facility to the annual line items for Friant Kern (RPS ID 60156) facility. Correspondingly, claims listed as being from Friant Madera (RPS ID 62380) facility and Friant River Outlet (RPS ID 62381) facility in

Appendix A, Table A-17, Page A-73, rows 21 through 24, have been deleted. These changes correct the records to show all generation from three generating units consistent with the facility certification at the time the procured electricity was generated. In the subject years, all generation was from a single facility certified with three generating units. The certification was subsequently amended to the current certification as three separate facilities, as was shown in the original verification report. These changes result in no net change in procured generation amounts. All changes to procured generation values are shown in strikethrough and underline format.
