Proposed resiliency microgrid for Fort Bragg

Hi. I live on the Mendocino Coast and am a member of the hospital Board. Our community is a disadvantaged one and suffered through 7 days of power outage last October. My company, UniGen Resources, submitted a bid in response to PG&E's DGEM RFO to develop a solar + storage microgrid to serve critical loads in Fort Bragg including the hospital. PG&E, of course, cancelled the DGEM program and plans to install a DG here. PG&E has made it clear in conversations that hardening the grid in our area was highly unlikely (cost and logistics too much). So, our community needs some help to get in a position to own a microgrid.
