Inland Counties Incentive Project Requirements Webinar

**Thursday, April 29
10 a.m. - 12 p.m. PT**

The California Electric Vehicle Infrastructure Project (CALeVIP) is coming to the counties of Butte, El Dorado, Imperial, Kings, Merced, Napa, Nevada, Placer, Solano, Stanislaus, Sutter, Tulare and Yolo. Launching on May 18, eligible businesses, workplaces, multifamily properties, local governments and K-12 school districts throughout the region can apply for incentives toward the installation of Level 2 and DC fast chargers. Properties serving disadvantaged and low-income communities are eligible for additional savings and free technical assistance to scope, plan and install EV charging infrastructure.

Join panelists from the Center for Sustainable Energy and California Energy Commission for our upcoming webinar. During the presentation, CALeVIP team members will cover details about the incentive project, rebate eligibility and provide a walk-through of the application process. Following the presentation, panelists will host a Q&A session.
